SKILLS

I am a **MERN** stack developer with many creative ideas for a good user experience.

Proficient in frontend development. (React, Next.js.14, NodeJs, ExpressJs, Typescript, Tailwind css, Shadcn)

Expert to make **high performance** web applications with an interactive and attractive design.

High problem solving skills.(DSA)

Proficient in English and communication.

EDUCATION

IPS ACADEMY , Indore — *Btech*

2023 - 2027

I am doing my bachelors degree in ips academy which is helping me in my tech career and i have participated in many tech events in the college and built many projects with the seniors of the college.

Experience

Have **3-4** years of experience in web development.

I have made a large number of projects and have experience of working with people.

PROJECTS

DSA Learner - For Beginners (NextJs, Tailwind, Typescript)

I have made an application which helps beginners to learn DSA. It provides a roadmap for the learners and small problems for them to learn concepts fast.

3D E-Commerce It is a web application in which the user can customize clothes according to his designs, colors, combination, etc. I have used 3D to move the shirt in 3D space and have a good ux.

Travel App It is my most efficient project as it is high in performance and has a clean and short code. It is a website for users planning for their travel and can experience their trip through this app.

Movie App It is an app in which you can make a list of your favorite movies and shows and can bookmark them for later to watch. It is my first project in which I added google authentication and database .
